Safend Auditor v3.6.1 Release Notes

Product Evaluation

The evaluation version of Safend Auditor is available the following method:

- Standalone – Allows 30 days of evaluation with full functionality before the evaluation expires.

Once the evaluation is over, a message is displayed asking for the input of a license key. To request an extension to the evaluation or an upgrade to a fully **FREE** licensed version, please contact your local Safend partner or support@safend.com

What's New

1. "Auditor Report Viewer" – Auditor no longer work with HTML report due to browser technology limitations, a new Report Viewer was developed in house by Safend
2. You can now install the Auditor on Windows 8.1, Windows 10 x64, Windows Server 2012 R2
3. Auditor now support Windows 2012 domain OS
4. Auditor will no longer create XLS file and for now supporting XML files only including opening XML file directly from the Auditor
5. Updated User Guide with relevant changes for removing HTML / XLS support and details for the new reporter
6. Wi-Fi is no longer relying on Wireless Zero configuration
7. Active Directory "Container" objects are now showed as part of the Organizational Units in the Auditor

Known Issues

1. Only devices that were directly connected to a port will be audited. For example, if a USB Bluetooth dongle is connected to the USB port and a Bluetooth mouse is connected to the dongle, then the Bluetooth dongle will be included in the audit results but the Bluetooth mouse will not
2. Setup API scanning method, will not work. Use the WMI scan method instead
3. Setup API still appears as Scanning protocol and will removed from the menu on the next versions
4. Hubs of any type will not be displayed in the audit results.
5. Presented XML report when opening in excel showing more columns than the actual report.
