### DUAL TWO-PASS CASCADING ENCRYPTION

Building on the success and design of our award winning DataLocker DL3, the DataLocker DL3 FE (FIPS Edition) provides unmatched usability and security. Utilizing the sleek design and portable form factor of its predecessor, the DL3 FE pairs blazing USB 3.0 speeds and two independent crypto processors. Utilizing two-pass encryption, data is encrypted with a single round of 256-bit AES XTS mode encryption directly passed to a second crypto engine undergoing a second round of 256-bit AES CBC mode encryption.

Our patented design, featuring a backlit touch screen with an alphanumeric rotating keypad, allows for strong passwords and absolute security.

Optional 2-factor authentication utilizes a RFID tag in addition to your password for added protection.

Optional 2-factor RFID Authentication
