

Denatal Workflow Enhanced

Saving maximum time for
Dentists and Hygienists

PROXIMITY LOCK AND UNLOCK

Login and out seamlessly with your presence.

BEFORE GATEKEEPER

WITH GATEKEEPER

Type a long, mandated password.

Sometimes you forget your password, sometimes you mistype.

Computer automatically authenticates you.

No more typing long, mandated passwords. Typing passwords in the operatory is a thing of the past.

Reopen everything on all of your computers.

When you move to another PC, your saved session opens back up — saving maximum time.

Your session follows you on whichever PC.

When you move to another PC, your saved session opens back up—saving maximum time.

Log in again, on all of your computers.

Remember long passwords, type username and passwords dozens of times a day.

All passwords auto-fill on websites.

No more typing usernames and passwords on any website. Your passwords will be available on all of your computers

“Forgot Password” and “Password Reset”

IT helpdesk, dentists, and hygienists spend too much wasted time waiting for resetting passwords.

100% rate of correct passwords.

Automated passwords never fail and are never incorrect. Save lots of time.

Must remember to manually lock computer to meet compliance

Everyone forgets to lock their computer. Especially in hospitals, this leaves PHI vulnerable to exposure.

Auto-Locks computer when leaving.

Automatic lock when the employee leaves -minimizing the threat and staying compliant.
