

## Safend DPS v3.4.9 SP2 - What's New

	<i>Safend Data Protection Agent</i>	<i>Safend Data Protection Server</i>
<b>32 bit</b>	3.4.9728.0	
<b>64 bit</b>	3.4.9728.0	3.4.9726.0

### Notifications

- Upgrading to 3.4.9 SP2 can only be done from 3.4.9 or 3.4.9 SP1 (and 3.4.9 JP for Japanese language users). If upgrading from an earlier release, please ensure that you upgrade to one of the 3.4.9 versions first.

**FYI:** 3.4.9 Cannot be upgraded to 3.4.9 SP1

### New Features

- **Windows 10 upgrade to Windows 10 Anniversary**
- **Support Windows 10 Anniversary**
- Japanese localization
- Stronger and up to date security communication method
  - SHA2 Certification
- New Best Practice Built-in Policy that meets EU GDPR regulations
- Verification for SHA2 functionality under Windows 7 SP1
- Agent can now be installed without WMI components
- Microsoft SecureBoot integration on Safend-Enabled workstations
- Support MSSQL 2014
- Support MSSQL 2016

### Significant Fixes

- Agent service start timeout on Windows x86/x32
- Temp Folder no longer keep files after creation of SYB
- Licensing counting issue
- Logs of 'Block USB Port' from Agent with 8.1 OS are not received in the Server.
- Machines don't receive policy even if there are free seats left.
- Uninstall doesn't remove Safend WMI Class
- Special characters in the Active Directory objects description are now handled

## Fixes & Minor Enhancements

- Backend functionality for licensing verification
- Cut date and time field in Scheduled System Backup screen in Japanese
- Wrong username reported in the console when using Windows 10 as a client (reported username is: "Window Manager\DWM-1").

## Notes

- Windows Vista no longer supported.
- Exploratory QA for Management Server on Windows Server 2016 completed successfully.
